

Build Your Watchman's Tool Stack

Two to four tools. One line of purpose each. Empty rows are honest.

A watchman knows every tool on his belt and why it's there. Open the AI Tools Landscape, pick the two-to-four tools that will actually earn their keep across your home, your work, and your ministry, and write one line of purpose for each. The man who picks a deliberate stack defaults less and ships more.

THE ACTION

- Open the AI Tools Landscape (the toolkit page) and read the tier ratings.
- Pick 2–4 tools you'll genuinely use this cohort — resist the urge to collect.
- Write one line per tool: "I use this for _____. " If you can't fill the line, drop the tool.
- Note which tier each tool sits in so you know your starting points from your specialty picks.

OPERATOR'S DISCIPLINE

A bloated stack is a tell that you're collecting tools instead of using them. Four tools you've mastered beat twenty you've bookmarked.

SCRIPTURE

Proverbs 27:23 — "Be diligent to know the state of your flocks, and attend to your herds." Know what's on your belt the same way you'd know your herd. Tools you can't account for own you.
